

Final Performance Evaluation of Njira Development Food Assistance Project in Malawi

July 2020 | Volume II – Annexes I, J, & K

IMPEL | Implementer-Led Evaluation & Learning Associate Award

ABOUT IMPEL

The Implementer-Led Evaluation & Learning Associate Award works to improve the design and implementation of Food for Peace (FFP) funded development food security activities (DFSAs) through implementer-led evaluations and knowledge sharing. Funded by the USAID Office of Food for Peace (FFP), the Implementer-Led Evaluation & Learning Associate Award will gather information and knowledge in order to measure performance of DFSAs, strengthen accountability, and improve guidance and policy. This information will help the food security community of practice and USAID to design projects and modify existing projects in ways that bolster performance, efficiency and effectiveness. The Implementer-Led Evaluation & Learning Associate Award is a two-year activity (2019-2021) implemented by Save the Children (lead), TANGO International, and Tulane University, in Haiti, the Democratic Republic of Congo, Madagascar, Malawi, Nepal, and Zimbabwe.

RECOMMENDED CITATION

IMPEL. (2020). *Final Performance Evaluation of Njira Development Food Assistance Project in Malawi* (Vol. 2). Washington, DC: The Implementer-Led Evaluation & Learning Associate Award

TABLE OF CONTENTS

Annex I: Data Collection Instruments	2
Part A: Qualitative Study Topical Outline.....	2
Part B: Quantitative Population-Based Survey.....	3
Household Survey.....	3
Anthropometric Survey	154
Annex J: Disclosure of Conflicts of Interest	163
Annex K: Additional Analysis of PBS Data	164

ANNEX I: DATA COLLECTION INSTRUMENTS

Part A: Qualitative Study Topical Outline

Njira Qualitative Study
Focus Group Discussions
Topical Outline

Criteria: Project Impact, Satisfaction, Relevance

1. Tell us about how the project appeared in this village (the story of the project at this site)
 - a. How people learned about it
 - b. Who made contact with the village
 - c. What activities were carried out
 - d. How people were chosen to participate
 - e. How the project operated
 - f. Frequency of visits from project staff
2. Tell us your opinion of the impact of this project activity
 - a. Which benefits were most important
 - b. Appropriate households were chosen
 - c. Benefits were spread evenly across the participants
 - d. Project activities addressed perceived needs in the village
 - e. Were there any project activities that you did not want or weren't interested in
 - f. Perceptions of any negative consequences of the project
 - g. What changes has the village experienced over the last 5 years

Criteria: Effectiveness, Coordination

3. Tell us how the project the project was managed
 - a. Did assets and support occur on a timely basis
 - b. Did the activities generate expected outcomes
 - c. Did staff provide appropriate support

- d. Factors that affected the positive outcomes
- e. Factors that constrained expected outcomes
- f. How many project activities occurred simultaneously in the village
- g. How were groups formed
- h. How many project-based groups were formed
- i. How were groups coordinated
- j. What role did the government play in the project

Criteria: Sustainability, Lessons Learned

- 4. Tell us how the community will continue now that the project is over
 - a. Is there a community plan for continuing with the project groups
 - b. Will other government agencies continue to work with the village
 - c. Does the village think that outcomes of the project will last
 - d. How could this project been improved

Part B: Quantitative Population-Based Survey

<p>Begin Interview- Please READ Hello. My name is (___). I am working with CARD. We are conducting a survey to learn about food security, food consumption, nutrition and wellbeing of households in Malawi. Your household was selected for the survey. I would like to ask you some questions about your household. The questions usually take about 2 hours. All of the answers you give will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to answer the questions since your views are important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time. Another member of my team will come and take height and weight measurements of the eligible women and children in the HH. Do you have any questions about the study or about your participation? You or other respondents can ask any questions you maybe have about the study at any time. Do you agree to participate in the survey? If you have question about the study or about your participation, you or other respondents may ask any questions you may have about the study at any time.</p>	

<p><i>It is necessary to introduce the household to the survey and obtain the consent of all respondents. 1. First identify the primary decision maker and conduct the informed consent with them. 2. Then begin the interview. Add household members by selecting "add group", when done select "Do not add". Consent for subsequent modules will be at the beginning of each module.</i></p>	
<p>A08: Please tell me who is the primary male adult (15 years or older) decision-maker in the household? <i>In households where there are no adult males, please enter "N/A". Enter -8 for Don't Know; -9 for Refused</i></p>	<input type="text"/>
<p>A09: Please tell me who is the primary female adult (15 years or older) decision-maker in the household? <i>In households where there are no adult females, please enter "N/A". Enter -8 for Don't Know; -9 for Refused</i></p>	<input type="text"/>
<p>A10: Does the primary adult (15 years or older) decision-maker in the household consent to participate in this household survey? <i>If the Head of HH is not available, you may select the next primary adult decision maker as long as they are aged 15 years and over. You still must start the survey by recording the Head of Household first, even if this person is not present.</i></p>	<p> <input type="radio"/> Yes, I agree to participate in the survey <input type="radio"/> No, I do not agree to participate in the survey </p>
<p>Please tell me the name and sex of each person who lives here, <i>starting with the head of the household</i>. For our purposes today, members of a household are adults or children that live together and eat from the "same pot". It should include anyone who has lived in your house for 6 of the last 12 months, but it does not include anyone who lives here but eats separately.</p>	
<p>HH Member ID #: \${mem}</p>	
<p>B01: Name of the household member</p>	<input type="text"/>
<p>B02: How old is <u>\${B01}</u> ? <i>Head of household must be over 15 years of age. Household roster (Module B) must begin with the head of household. If a <u>child</u> of a household member is less than 1, then please enter "0". If age is more than 95, then please enter "95". Enter -8 for Don't Know; -9 for Refused</i></p>	

B03: Is <u>§{B01}</u> male or female ?	<input type="radio"/> Male <input type="radio"/> Female
<p>B03a: Yes, this is a female between the ages of 15 and 49 years of age and is eligible for module E (Women's Nutrition, Breastfeeding and Antenatal Care).</p> <p><i>Please mark the paper tools accordingly There is no need to re-ask the respondent her age. This question will only appear if she has already answered between 15 and 49 years of age for question B2.</i></p>	<input type="radio"/> Yes, she is an eligible female between the ages of 15 and 49 years of age
B04a: What is the relationship of <u>§{B01}</u> to the head of the household?	<input type="radio"/> Head of household
<p>B04b: What is the relationship of <u>§{B01}</u> to the head of the household?</p> <p><i>Household Head is the first household member entered</i></p>	<input type="radio"/> Wife or Husband <input type="radio"/> Daughter/Son <input type="radio"/> Daughter/Son-in-Law <input type="radio"/> Grandchild <input type="radio"/> Parent <input type="radio"/> Parent-in-Law <input type="radio"/> Brother/Sister <input type="radio"/> Other Relative <input type="radio"/> Adopted/Foster/Stepchild <input type="radio"/> Not Related <input type="radio"/> Don't Know <input type="radio"/> Refused
B05: Is <u>§{B01}</u> a responsible adult if head of household is absent?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>B05a: Yes, this person is an eligible household member for modules F (Water, Sanitation and Hygiene) and H2 - H7 (Household Expenditures), please mark the paper tools accordingly.</p> <p><i>Please mark the paper tools accordingly</i></p>	<input type="radio"/> Yes, this person is an eligible household member, please mark the paper tools accordingly.
B06: Is <u>§{B01}</u> the primary person responsible for food preparation in the household?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>B06a: Yes, this person is an eligible household member for modules C (Food Access) and H1.1 (FOOD CONSUMPTION).</p> <p><i>Please mark the paper tools accordingly</i></p>	<input type="radio"/> Yes, this person is an eligible household member, please mark the paper tools accordingly.

<p>The primary caregiver is the person who knows the most about how and what the child is fed. Usually, but not always, this person will be <u>§{B01}</u>'s mother.</p>	
<p>B07: Please record name of the primary caregiver of <u>§{B01}</u>? <i>The primary caregiver and the child are eligible for Module D (Primary Caregiver). Please mark the paper tools accordingly</i> <i>If the primary caregiver name is not on the roster, ensure that the primary caregiver is a household member, if yes make sure the primary caregiver is added to the household roster. Enter -8 for Don't Know; -9 for Refused</i></p>	<input type="text"/>
<p>B07_ID: Please record the roster member ID number of the primary caregiver <i>If the primary caregiver name is not on the roster enter -10</i></p>	
<p>B07a : Please record name of the primary caregiver of <u>§{B01}</u>? <i>The primary caregiver and the child are eligible for Module D (Primary Caregiver). Please mark the paper tools accordingly</i> <i>If the primary caregiver name is not on the roster, ensure that the primary caregiver is a household member, if yes make sure the primary caregiver is added to the household roster. Enter -8 for Don't Know; -9 for Refused</i></p>	<input type="text"/>
<p>B07a_ID: Please record the roster member ID number of the primary caregiver <i>If the primary caregiver name is not on the roster enter -10</i></p>	
<p>B08: What is <u>§{B01}</u>'s current marital status?</p>	<p> <input type="radio"/> Married or living together <input type="radio"/> Divorced/separated <input type="radio"/> Widowed <input type="radio"/> Never married and never lived together <input type="radio"/> Don't Know <input type="radio"/> Refused </p>
<p>B09: Is <u>§{B01}</u> the biological parent of a child under the age of 2 (23 months or younger) living in this household?</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused </p>
<p>B09a: Yes, this person is biological parent of a child under the age of 2 (23 months or younger) and is eligible for module K (MCHN-All Men and Women</p>	<p> <input type="radio"/> Yes, this person is biological parent of a child under the age of 2 (23 months or younger) </p>

<p>with Child Under 2 Years), please mark the paper tools accordingly.</p> <p><i>Please mark the paper tools accordingly</i></p>	
<p>B10: Has $\\$ \{B01\}$ done any work in the last 12 months?</p> <p><i>Work includes jobs in the formal and/or informal sector, full time, part time, or seasonal work that is done within and/or outside the home. It includes, but is not limited to agricultural daily wage labor, off-farm daily wage labor, income generation activities, sale of goods produced or processed outside the home or at the home, homestead garden or farm (e.g., vegetables, eggs, fish, livestock, artisanal goods), or petty trading. For this indicator, work does not include participating in cash for work, food for work, or conditional transfers and/or productive safety net programs. It does not include either caring for own children, cooking, cleaning or doing other routine chores for own household (e.g., fetching water, collecting firewood) or being involved in agricultural production solely for household consumption.</i></p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> Don't know</p> <p><input type="radio"/> Refused</p>
<p>B11: During the last 12 months, was $\\$ \{B01\}$ usually paid in cash or kind for this work or was $\\$ \{B01\}$ not paid at all?</p>	<p><input type="radio"/> Cash only</p> <p><input type="radio"/> Cash and in-kind</p> <p><input type="radio"/> In-kind only</p> <p><input type="radio"/> Not paid</p> <p><input type="radio"/> Don't know</p> <p><input type="radio"/> Refused</p>
<p>B11a: Yes, this person is an eligible cash earner who has worked and earned cash in the past 12 months and is eligible for module J (Gender - Cash), please mark the paper tool accordingly.</p> <p><i>Please mark the paper tools accordingly</i></p>	<p><input type="radio"/> Yes, this household member has worked and earned cash in the past 12 months, please mark the paper tool accordingly</p>
<p>B12: Does $\\$ \{B01\}$ have access to a plot of land (even if very small) over which he/she makes decisions about what will be grown, OR how it will be grown, OR how to dispose of the harvest?</p> <p><i>Includes plots of land allocated to farmers for growing crops but not owned</i></p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> Don't know</p> <p><input type="radio"/> Refused</p>
<p>B13: Does $\\$ \{B01\}$ have animals and/or aquaculture products over which he/she makes make decisions about their management OR how to dispose of the production?</p>	<p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p> <p><input type="radio"/> Don't know</p> <p><input type="radio"/> Refused</p>

<p>B13a: Yes this person is a Farmer and is eligible for module G (Agriculture), please mark the paper tool accordingly. <i>Please mark the paper tools accordingly</i></p>	<p><input type="radio"/> Yes, this person is an eligible farmer</p>
<p>B14: Is $\\$ \{B01\}$'s natural mother alive?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>B15: Does $\\$ \{B01\}$'s natural mother usually live in this household?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>B16: What is the name of $\\$ \{B01\}$'s natural mother. <i>Record mother's line number from household roster (using the paper tool). If the mother's name is not on the roster, ensure that the mother is a household member, if yes make sure she is added to the roster list. Enter -9 for refused</i></p>	<p><input type="text"/></p>
<p>B16a: What is her household member ID? <i>If the mother's name is not on the roster enter -10</i></p>	
<p>B17: Is $\\$ \{B01\}$'s natural father alive?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>B18: Does $\\$ \{B01\}$'s natural father usually live in this household?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>B19: What is the name of $\\$ \{B01\}$'s natural father. <i>Record father's line number from household roster (referring to the paper tool). If the father's name is not on the roster, ensure that the father is a household member, if yes make sure he is added to the roster list. Enter -9 for refused</i></p>	<p><input type="text"/></p>
<p>B19a: What is his household member ID? <i>If the father's name is not on the roster enter -10</i></p>	
<p>B20: Has $\\$ \{B01\}$ ever attended school?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>

<p>B21: What is the highest level of school <u>§{B01}</u> has attended?</p>	<p> <input type="radio"/> Pre-school (nursey) <input type="radio"/> Primary - Standard <input type="radio"/> Secondary Form <input type="radio"/> University or above <input type="radio"/> Technical or vocational <input type="radio"/> Adult literacy only (No formal education) <input type="radio"/> Korani/religious education (No formal education) <input type="radio"/> Don't Know <input type="radio"/> Refused </p>
<p>B21a: What is the highest grade <u>§{B01}</u> completed at that level?</p>	<p> <input type="radio"/> Grade 1 <input type="radio"/> Grade 2 <input type="radio"/> Grade 3 <input type="radio"/> Grade 4 <input type="radio"/> Grade 5 <input type="radio"/> Grade 6 <input type="radio"/> Grade 7 <input type="radio"/> Grade 8 <input type="radio"/> Don't Know <input type="radio"/> Refused </p>
<p>B21b: What is the highest grade <u>§{B01}</u> completed at that level?</p>	<p> <input type="radio"/> Grade 1 <input type="radio"/> Grade 2 <input type="radio"/> Grade 3 <input type="radio"/> Grade 4 <input type="radio"/> Don't Know <input type="radio"/> Refused </p>

G17: If " <u>§{G01}</u> " purchased drugs or medicines to give to livestock during the past 12 months, <u>where</u> did " <u>§{G01}</u> " primarily purchase the drugs?	<input type="radio"/> Veterinarian <input type="radio"/> Community animal health worker <input type="radio"/> Paravet <input type="radio"/> Agro-dealer <input type="radio"/> Other(Specify) <input type="radio"/> Did not purchase drugs/medicines <input type="radio"/> Don't Know <input type="radio"/> Refused
G17a: Please specify: <i>Enter -8 for Don't Know; -9 for Refused</i>	<input type="text"/>
G18: Did " <u>§{G01}</u> " use any of the following natural resources management practices or techniques that were not related directly to your on-farm production during the past 12 months? <i>Read each practice. Select those that were used.</i>	<input type="checkbox"/> Management or protection of watersheds or water catchments <input type="checkbox"/> Management of forest plantation <input type="checkbox"/> Sustainable harvesting of forest products <input type="checkbox"/> Did not practice any of these activities in past 12 months <input type="checkbox"/> Don't know <input type="checkbox"/> Refused
G20: During the past 12 months did " <u>§{G01}</u> " store any crops from the plot(s) over which you make decisions?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
G21: Did " <u>§{G01}</u> " use any of the following methods to store the crops? <i>Read each method. Select those that were used.</i>	<input type="checkbox"/> Pils bags <input type="checkbox"/> Improved granary <input type="checkbox"/> Warehousing or cereal banks <input type="checkbox"/> Use of trap <input type="checkbox"/> Grain bag with pesticides <input type="checkbox"/> Did not use any of these methods <input type="checkbox"/> Don't know <input type="checkbox"/> Refused
G22: During the past 12 months, did " <u>§{G01}</u> " access any extension services for his crops or livestock? <i>Read each reason. Select all that apply.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
G23: What type of extension services did " <u>§{G01}</u> " access in the past 12 months for " <u>§{G01}</u> 's" crops or livestock? <i>Select all that apply.</i>	<input type="checkbox"/> Production <input type="checkbox"/> Pest Management <input type="checkbox"/> Disease Control <input type="checkbox"/> Market Information

	<input type="checkbox"/> Other(Specify) <input type="checkbox"/> Don't Know <input type="checkbox"/> Refused
G23a: Please specify all other animals: <i>Enter -8 for Don't Know; -9 for Refused</i>	<input type="text"/>
G24: Has " <u>{G01}</u> " benefitted from at least one of the extension services for the past 12 months?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
G25: Who provided the extension services? <i>Select all that apply.</i>	<input type="checkbox"/> Government Extension Workers <input type="checkbox"/> Non-Governmental Organizations (NGO) <input type="checkbox"/> Private Sector/Company <input type="checkbox"/> Other(Specify) <input type="checkbox"/> Don't Know <input type="checkbox"/> Refused
G25a: Please specify: <i>Enter -8 for Don't Know; -9 for Refused</i>	<input type="text"/>
Now, I would like to ask you about statements about self-beliefs to cope with a variety of difficult demands in life.	
G26a: I can always manage to solve difficult problems if I try hard enough. <i>How much do they agree with the following statement?</i>	<input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused
G26b: If someone opposes me, I can find the means and ways to get what I want. <i>How much do they agree with the following statement?</i>	<input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused
G26c: It is easy for me to stick to my aims and accomplish my goals. <i>How much do they agree with the following statement?</i>	<input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused
G26d: I am confident I could deal efficiently with unexpected events.	<input type="radio"/> Not at all true <input type="radio"/> Hardly true

<p><i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26e: Thanks to my resourcefulness, I know how to handle unforeseen situations. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26f: I can solve most problems if I invest the necessary effort. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26g: I can remain calm when facing difficulties because I can rely on my coping abilities. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26h: When I am confronted with a problem I can usually find several solutions. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26i: If I am in trouble, I can usually think of a solution. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>G26j: I can usually handle whatever comes my way. <i>How much do they agree with the following statement?</i></p>	<p><input type="radio"/> Not at all true <input type="radio"/> Hardly true <input type="radio"/> Moderately true <input type="radio"/> Exactly true <input type="radio"/> Don't Know <input type="radio"/> Refused</p>
<p>Now, I would like to ask your perception on community leader's support to women's</p>	

<p>participation and taking leadership roles in community.</p>	
<p>G27a: Do community leaders encourage women to participate and take up leadership roles in your community?</p>	<p> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused </p>
<p>G27b: In which ways do local leaders offer support? <i>Select all that apply.</i></p>	<p> <input type="checkbox"/> Organize community meetings where women are invited <input type="checkbox"/> Organize community meetings at times when women can attend <input type="checkbox"/> Sensitize communities on the importance of female participation <input type="checkbox"/> Taking a role during selection of executive committees to ensure that women are included <input type="checkbox"/> Ensuring that topics important to women are discussed <input type="checkbox"/> Local leaders did not offer support in the ways listed above <input type="checkbox"/> Don't know <input type="checkbox"/> Refused </p>
<p>Begin Module C. Food Access <i>Respondents for this module: Household members responsible for food preparation in the household. Total number of eligible responsible adults are "<u>#{prep_count}</u>"</i></p>	
<p>C01_sel. Please select the name of the eligible household member who is responsible for food preparation in the household</p>	<p> <input type="radio"/> #{hm1} <input type="radio"/> #{hm2} <input type="radio"/> #{hm3} <input type="radio"/> #{hm4} <input type="radio"/> #{hm5} <input type="radio"/> #{hm6} <input type="radio"/> #{hm7} <input type="radio"/> #{hm8} <input type="radio"/> #{hm9} <input type="radio"/> #{hm10} <input type="radio"/> #{hm11} <input type="radio"/> #{hm12} <input type="radio"/> #{hm13} <input type="radio"/> #{hm14} <input type="radio"/> #{hm15} <input type="radio"/> #{hm16} <input type="radio"/> #{hm17} </p>

	<input type="radio"/> \${hm18} <input type="radio"/> \${hm19} <input type="radio"/> \${hm20} <input type="radio"/> \${hm21} <input type="radio"/> \${hm22} <input type="radio"/> \${hm23} <input type="radio"/> \${hm24} <input type="radio"/> \${hm25}
C02. Does "\${C01}" give consent to participate in Module C: Food Access?	<input type="radio"/> Yes, I agree to participate in the this module <input type="radio"/> No, I do not agree to participate in this module <input type="radio"/> Household Member was not available
C26. Why was "\${C01}" unable to complete the survey?	<input type="text"/>
C03: Was yesterday an unusual or special day (Festival, Funeral, etc.) or were most household members absent?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
Now I would like to ask you about the types of foods that you or anyone else in your household ate yesterday during the day and at night.	
C04: Did you or anyone else in your household eat "Maize, bread, rice, sorghum, millet, finger millet (Eleusine), barley, bulgar wheat, pasta, noodles, porridge, CSB (corn soy blend), ufasoya, or other foods made from cereals/grains" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
C05: Did you or anyone else in your household eat "Cassava, potatoes, sweet potatoes, orange-flesh sweet potatoes, yams, or any other foods made from roots or tubers (plantains)" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
C06: Did you or anyone else in your household eat "Any vegetables (leaves, root)? Such as carrots, pumpkin leaves, traditional / indigenous vegetables, okra, pumpkin, squash, gourds, tomato, or mushrooms" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused

<p>C07: Did you or anyone else in your household eat "Any fruits? Including traditional/indigenous fruits, watermelon, baobaba, etc" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C08: Did you or anyone else in your household eat "Any meat? Beef, pork, lamb, goat, rabbit, wild game, chicken, duck, frog, lizard, or other birds? Liver, kidney, heart, or other organ meats or blood" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C09: Did you or anyone else in your household eat "Any eggs? (chicken, turkey, fowl, duck)" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C10: Did you or anyone else in your household eat "Any fresh or dried fish, dried shellfish, or crabs" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C11: Did you or anyone else in your household eat "Any foods made from beans, peas, lentils, cowpeas, pigeon peas, groundnuts, or cashew nuts" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C12: Did you or anyone else in your household eat "Any cheese, yogurt, milk, sour milk, or other dairy products" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C13: Did you or anyone else in your household eat "Any foods made with oil, fat, animal fat, lard or butter" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C14: Did you or anyone else in your household eat "Any sugar, honey, sugar cane, or sweet reed" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>

<p>C15: Did you or anyone else in your household eat "Any other foods, such as tomato sauce or condiments, spices, coffee, or tea" yesterday? <i>Do not include foods consumed outside the home that were prepared elsewhere.</i></p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>HSS Questions <i>Now I will ask you about the food you have consumed in the past 30 days</i></p>	
<p>C16: In the past [4 WEEKS/30DAYS] was there ever no food to eat of any kind in your house because of lack of resources to get food?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C17: How often did this happen in the past [4 WEEKS/30 DAYS]? <i>Read options.</i></p>	<p><input type="radio"/> Rarely (1-2 times) <input type="radio"/> Sometimes (3-10 times) <input type="radio"/> Often (more than 10) <input type="radio"/> Does Not Know <input type="radio"/> Refused</p>
<p>C18: In the past [4 WEEKS/30 DAYS] did you or any household member go to sleep at night hungry because there was not enough food?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C19: How often did this happen in the past [4 WEEKS/30 DAYS]? <i>Read options.</i></p>	<p><input type="radio"/> Rarely (1-2 times) <input type="radio"/> Sometimes (3-10 times) <input type="radio"/> Often (more than 10) <input type="radio"/> Does Not Know <input type="radio"/> Refused</p>
<p>C20: In the past [4 WEEKS/30 DAYS] did you or any household member go a whole day and night without eating anything at all because there was not enough food?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>C21: How often did this happen in the past [4 WEEKS/30 DAYS]? <i>Read options.</i></p>	<p><input type="radio"/> Rarely (1-2 times) <input type="radio"/> Sometimes (3-10 times) <input type="radio"/> Often (more than 10) <input type="radio"/> Does Not Know <input type="radio"/> Refused</p>
<p>Assistance and coping questions <i>Please make sure the respondent understands that his/her response to these questions will have no influence on whether the household will be eligible or ineligible to receive future assistance.</i></p>	
<p>C22: Did you receive any of the following types of assistance during the past 12 months? <i>Read each response and choose all that apply.</i></p>	<p><input type="checkbox"/> Food <input type="checkbox"/> Cash <input type="checkbox"/> Crop inputs (fertilizer, seed)</p>

	<ul style="list-style-type: none"> <input type="checkbox"/> Livestock inputs <input type="checkbox"/> WASH inputs (chlorine, jerrycans, soap, Sanplat, covered buckets, etc.) <input type="checkbox"/> Household kits (pots, pans, etc.) <input type="checkbox"/> Plastic sheeting/tarpoline <input type="checkbox"/> Mosquito nets <input type="checkbox"/> Other (Specify) <input type="checkbox"/> No assistance received <input type="checkbox"/> Don't know <input type="checkbox"/> Refused
<p>C22a: Please specify: <i>Enter -8 for Don't Know; -9 for Refused</i></p>	<input style="width: 100px; height: 20px;" type="text"/>
<p>C23: Who did you receive the assistance from? <i>NGO=Non-governmental Organization</i></p>	<ul style="list-style-type: none"> <input type="checkbox"/> Government <input type="checkbox"/> NGO <input type="checkbox"/> Community group <input type="checkbox"/> Farmers COOP/Association <input type="checkbox"/> Friend or family member <input type="checkbox"/> Other (Specify) <input type="checkbox"/> Don't Know <input type="checkbox"/> Refused
<p>C23a: Please specify: <i>Enter -8 for Don't Know; -9 for Refused</i></p>	<input style="width: 100px; height: 20px;" type="text"/>
<p>C24: Did you receive the assistance in response to a shock?</p>	<ul style="list-style-type: none"> <input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>C25: Did you experience any of the following shocks during the last 12 months? <i>Read each response and choose all that apply.</i></p>	<ul style="list-style-type: none"> <input type="checkbox"/> Drought <input type="checkbox"/> Flood/water logging <input type="checkbox"/> Strong winds or storms <input type="checkbox"/> Crop disease or crop pests <input type="checkbox"/> Livestock disease or deaths <input type="checkbox"/> Loss of job/non-payment <input type="checkbox"/> Large fall in sale price of crops <input type="checkbox"/> Large rise in prices of food <input type="checkbox"/> Death in household <input type="checkbox"/> Break-up of the household <input type="checkbox"/> Illness <input type="checkbox"/> Theft <input type="checkbox"/> House damaged due to fire

	<input type="checkbox"/> End of regular assistance, aid or remittances from outside <input type="checkbox"/> Other (Specify) <input type="checkbox"/> No shock experienced <input type="checkbox"/> Don't Know <input type="checkbox"/> Refused
<p>C25a: Please specify: <i>Enter -8 for Don't Know; -9 for Refused</i></p>	<input type="text"/>
<p>Begin Module D1: Children's Nutritional Status and Feeding Practices READ: I would now like to ask you some questions about your children. <i>Respondents for this module: Primary Caregivers of children under the age of 5 years old (59 months or younger) Repetitions: For all children under the age of 5 years old (59 months or younger) Total number of eligible children under the age of 5 years is "\${kid_countall}"</i></p>	
<p>D01_sel : Please select that names of the <u>children</u> under 5 from the list:</p>	<input type="checkbox"/> \${hm1} <input type="checkbox"/> \${hm2} <input type="checkbox"/> \${hm3} <input type="checkbox"/> \${hm4} <input type="checkbox"/> \${hm5} <input type="checkbox"/> \${hm6} <input type="checkbox"/> \${hm7} <input type="checkbox"/> \${hm8} <input type="checkbox"/> \${hm9} <input type="checkbox"/> \${hm10} <input type="checkbox"/> \${hm11} <input type="checkbox"/> \${hm12} <input type="checkbox"/> \${hm13} <input type="checkbox"/> \${hm14} <input type="checkbox"/> \${hm15} <input type="checkbox"/> \${hm16} <input type="checkbox"/> \${hm17} <input type="checkbox"/> \${hm18} <input type="checkbox"/> \${hm19} <input type="checkbox"/> \${hm20} <input type="checkbox"/> \${hm21} <input type="checkbox"/> \${hm22}

	<input type="checkbox"/> \${hm23} <input type="checkbox"/> \${hm24} <input type="checkbox"/> \${hm25}
<p>D02: Please select the name of the <i>primary caregiver</i> for "\${D01}"</p> <p><i>If the primary caregiver is not available, please return (select the back arrow) to question D01 and unselect that child. All primary caregivers and children must be on the household roster.</i></p>	<input type="radio"/> \${hm1} <input type="radio"/> \${hm2} <input type="radio"/> \${hm3} <input type="radio"/> \${hm4} <input type="radio"/> \${hm5} <input type="radio"/> \${hm6} <input type="radio"/> \${hm7} <input type="radio"/> \${hm8} <input type="radio"/> \${hm9} <input type="radio"/> \${hm10} <input type="radio"/> \${hm11} <input type="radio"/> \${hm12} <input type="radio"/> \${hm13} <input type="radio"/> \${hm14} <input type="radio"/> \${hm15} <input type="radio"/> \${hm16} <input type="radio"/> \${hm17} <input type="radio"/> \${hm18} <input type="radio"/> \${hm19} <input type="radio"/> \${hm20} <input type="radio"/> \${hm21} <input type="radio"/> \${hm22} <input type="radio"/> \${hm23} <input type="radio"/> \${hm24} <input type="radio"/> \${hm25}
<p>D03: Does the "primary caregiver" give consent to participate in Module D1: Children's Nutritional Status and Feeding Practices and Module D2: Children's Diarrhea and Oral Rehydration Therapy?</p>	<input type="radio"/> Yes, I agree to participate in the this module <input type="radio"/> No, I do not agree to participate in the module <input type="radio"/> Household Member was not available
<p>D07: How old is "\${D01}" in complete years?</p> <p><i>Must record completed years. If the child is 1 year and 11 months old, please record the child as "1" year old. If the child is 4 years and 11 months old please record the child as "4" years old. If the child is less the a year please record "0" If the child is 5 years or older please enter -10, and you will be prompted to the next eligible child or the next Module</i></p>	
<p>D08: Are you (or anyone in HH) receiving food rations as part of <u>Njira Project</u> and/or <u>UBALE Project</u></p>	<input type="radio"/> Yes <input type="radio"/> No

activities? Or have you received food rations in the past from the project?	<input type="radio"/> Don't know <input type="radio"/> Refused
D09: Please specify from where?	<input type="text"/>
D10: Are you (or anyone in HH) participating in nutrition training/meetings organized as part of <u>Njira Project</u> or <u>UBALE Project</u> activities? Or have you participated nutrition activities in the past?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
Exclusive Breast Feeding and Minimum Acceptable Diet	
D16 : Has " <u>§{D01}</u> " ever been breastfed?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
D17: Was " <u>§{D01}</u> " breastfed yesterday during the day or night ?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
D18. Did " <u>§{D01}</u> " consume breast milk in any of these ways yesterday during the day or at night? <i>Sometimes babies are breastfed by another woman or given breast milk from another woman by spoon, cup, bottle, or some other way. This can happen if a mother cannot breastfeed her own baby for various reasons, such as the mother is sick or away, has mastitis, etc.</i>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
Now I would like to ask you about some medicines and vitamins that are sometimes given to infants.	
D19: Was " <u>§{D01}</u> " given any vitamin drops or other medicines as drops yesterday during the day or at night?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
D20: Was " <u>§{D01}</u> " given oral rehydration solution yesterday during the day or at night?	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
Next I would like to ask you about some liquids that " <u>§{D01}</u> " may have had yesterday during the night or at day. Did " <u>§{D01}</u> " have:	
D21: Did " <u>§{D01}</u> " have plain water?	<input type="radio"/> Yes <input type="radio"/> No

	<input type="radio"/> Don't know <input type="radio"/> Refused
<p>D22: Did "<u>§{D01}</u>" have any kind of infant formula? <i>If the respondent is unsure of what is meant by "infant formula" then probe with brand names such as Nani, SMA, Nestle, Enfamil, Isomil, Lactogen?</i></p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D23: How many times yesterday during the day or at night did "<u>§{D01}</u>" consume any formula?</p>	
<p>D24: Did "<u>§{D01}</u>" have any milk such as tinned, powdered or fresh animal milk?</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D25: How many times yesterday during the day or at night did "<u>§{D01}</u>" consume any milk?</p>	
<p>D26: Did "<u>§{D01}</u>" have any juice or juice drinks (e.g., Mazoe, Sobo Squash), including sodas, cream sodas, etc.?</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D27: Did "<u>§{D01}</u>" have any clear broth?</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D28: Did "<u>§{D01}</u>" have any yogurt/yogi?</p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D29: How many times yesterday during the day or at night did "<u>§{D01}</u>" consume any yogurt?</p>	
<p>D30: Did "<u>§{D01}</u>" have any thin porridge? (PROBES: gruel, Gerber, Cerelac, Ace, Nestum, Cerevita, Purity) <i>Limit to porridge mixed very thin or thick drinks made from cereal (For example: Gruel, Gerber, Cerelac, Ace, Nestum, Cerevita, Purity). Thicker less liquid porridge is included under item D33.</i></p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>D31: Any other liquids? <i>PROBES: Gripe water, glucose water, sugar water?</i> <i>PROBES: Gripe water, madzi opatsa mphamvu (glucose water) kapena madzi ashuga?</i></p>	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused
<p>Next I would like to ask you about (other) liquids or foods that "<u>§{D01}</u>" ate yesterday during the day or at night. I am interested in whether your child had</p>	

<p>the item even if it was combined with other foods. For example, if "<u>{D01}</u>" ate a rice porridge made with a mixed vegetable sauce, you should reply yes to any food I ask about that was an ingredient in the porridge or sauce. Please do not include any food used in a small amount for seasoning or condiments (like chilies, spices, herbs, or fish powder). I will ask you about those foods separately. Yesterday, during the day and night, did "<u>{D01}</u>" eat any of the following:</p>	
<p>D33: Yesterday, during the day and night, did "<u>{D01}</u>" eat or drink any bread, savory biscuits, porridge, crackers, pasta, noodles, rice, or other foods made from grains such as corn, wheat, millet, sorghum, bulgar, wheat, barley?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>
<p>D34a: Yesterday, during the day and night, did "<u>{D01}</u>" eat or drink any orange-fleshed sweet potatoes or foods made from orange-fleshed sweet potatoes such as porridge, flitters, or stew for example?</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Don't know <input type="radio"/> Refused</p>

<p>MODULE H1.1. FOOD CONSUMPTION OVER PAST 7 DAYS <i>Respondents for this module: Household members responsible for food preparation in the household. Total number of eligible farmers is "<u>{\$prep count}</u>"</i></p>	
<p>Read to respondent: Now I would like to ask you about the kinds of foods that you and other members of your household have eaten over the past week. I'd also like to ask you about items that</p>	

<p>you or members of your household may have bought in the past week. Please include foods in meals that are shared with other members of the household, as well as foods that individual members of the household may have consumed independently of other family members. First, we will ask about foods that were eaten at your home, or at the home of friends or other family. Later we will ask about foods that were purchased already prepared from a restaurant or a vendor.</p>	
<p>H01. Please select the name of the person in charge of food preparation in last 7 days (same person as Module C)</p>	<p> <input type="radio"/> \${hm1} <input type="radio"/> \${hm2} <input type="radio"/> \${hm3} <input type="radio"/> \${hm4} <input type="radio"/> \${hm5} <input type="radio"/> \${hm6} <input type="radio"/> \${hm7} <input type="radio"/> \${hm8} <input type="radio"/> \${hm9} <input type="radio"/> \${hm10} <input type="radio"/> \${hm11} <input type="radio"/> \${hm12} <input type="radio"/> \${hm13} <input type="radio"/> \${hm14} <input type="radio"/> \${hm15} <input type="radio"/> \${hm16} <input type="radio"/> \${hm17} <input type="radio"/> \${hm18} <input type="radio"/> \${hm19} <input type="radio"/> \${hm20} <input type="radio"/> \${hm21} <input type="radio"/> \${hm22} <input type="radio"/> \${hm23} <input type="radio"/> \${hm24} <input type="radio"/> \${hm25} </p>
<p>H02: Does "<u>\${H01}</u>" give consent to continue?</p>	<p> <input type="radio"/> Yes, I agree to participate in the this module <input type="radio"/> No, I do not agree to participate in this module <input type="radio"/> Household Member was not available </p>
<p>H03: Why was "<u>\${H01}</u>" unable to complete the survey</p>	<p><input type="text"/></p>

Anthropometry Children Section (children under 5 years of age)	

<p>ant_1. Please enter the name of the child <i>If there are no eligible children with their primary caregivers, please enter -10 here. In the next screen, DO NOT add another group</i></p>	<input type="text"/>
<p>ant_1a. Please enter the HH member ID number from the Household Roster <i>This number should match the number of the same person that the enumerator interviews.</i></p>	<p style="text-align: right;">\${ant_1}!=-10</p>
<p>ant_2. Please enter the name of the primary caregiver</p>	<p style="text-align: right;">\${ant_1}!=-10</p> <input type="text"/>
<p>ant_3. Does <u>ant_2</u> give consent to participate in the survey and allow his/her child to be measured for height and weight? <i>Before beginning any measurement, consent must be obtained from the primary caregiver of the child to be weighed and measured. Consent is necessary before taking any measurements. If the person refuses to participate, respect this decision and do not take any measurement. Always thank the caregiver.</i></p>	<p style="text-align: right;">\${ant_1}!=-10</p> <p><input type="radio"/> Yes, I agree to participate in the survey and allow your child to be weighed and measured</p> <p><input type="radio"/> No, I do not agree to participate in the survey and allow your child to be weighed and measured</p>
<p>ant_4. Does <u>ant_2</u> have any documents with the birth date of <u>ant_1</u> recorded?</p>	<p style="text-align: right;">\${ant_3}= 1 and \${ant_1}!=-10</p> <p><input type="radio"/> Birth Certificate</p> <p><input type="radio"/> Baptismal/Church Record</p> <p><input type="radio"/> Health Registration Card</p> <p><input type="radio"/> Home Record</p> <p><input type="radio"/> Parent Statement</p> <p><input type="radio"/> Specify Other:</p> <p><input type="radio"/> Does Not Know</p> <p><input type="radio"/> Refused</p>
<p>ant_4a. Specify Other</p>	<p style="text-align: right;">selected (\${ant_4}, "6")</p> <input type="text"/>
<p>Instructions for Birth conversion Table: 1. Use the child's birth year given in question ant_5, to covert child's age into months 2. To use Birth conversion Table go to the appropriate table as labeled on the side of each table "Birth Date". Example: If the child is born in 2017, use the table with "Birth Date – 2017" on the side. 3. Using the current month, select the appropriate "Study Date" column. Example: If it is April 2019, use the middle column labeled Apr.. 4. Check the child's birth month and cross the appropriate "Study Date" month column with the row of the child's birth month. Example: Today is April 11, 2019 and the</p>	

<p>child is born on September 27, 2017. Cross the middle column “Apr.” with the row “Sept.” in the table “Birth Date – 2017”. 5. The digit in the cell where the column of the study month and the birth month of the child meet is the child’s age in months. For the example above, the child is 19 months old. 6. Enter this number for question ant_5a. Double check for consistency</p>	
<p>ant_5. What is the birthdate of $\\$ \{ \text{ant}_1 \}$? <i>Please record birthday shown on the documents given by the primary caregiver. If $\\$ \{ \text{ant}_1 \}$'s records are not available, please ask the primary caregiver what $\\$ \{ \text{ant}_1 \}$'s birthday is and record below.</i></p>	<p>Day: <input type="text"/></p> <p>Month: <input type="text"/></p> <p>Year: <input type="text"/></p>
<p>ant_5a. What is the age of $\\$ \{ \text{ant}_1 \}$ in months? <i>Children need to be 59 months or younger, if older please enter -10 and you will be prompted to add another eligible child ("add group") or move on to the Women's section of the Anthropometry Module.</i></p>	<p>$\\$ \{ \text{ant}_3 \} = 1$</p>
<p>ant_6. Sex of $\\$ \{ \text{ant}_1 \}$</p>	<p><input type="radio"/> Male <input type="radio"/> Female</p>
<p>ant_7. Weight of $\\$ \{ \text{ant}_1 \}$ in Kilograms <i>For weight measurements, be sure to include TWO numbers after the decimal point (eg, XX.XX) If $\\$ \{ \text{ant}_1 \}$ was unable to be measured please enter "-9" for measurement</i></p>	
<p>ant_8. Height of $\\$ \{ \text{ant}_1 \}$ in Centimeters <i>For height measurements, be sure to include ONE number after the decimal point (e.g., XX.X) If $\\$ \{ \text{ant}_1 \}$ was unable to be measured please enter "-9" for measurement</i></p>

1. Introduction

This report is a supplement to the *Final Performance Evaluation of the Food for Peace Njira Development Food Assistance Project (DFAP) in Malawi*.¹ It provides results from additional analysis of quantitative data from the Njira project. Specifically, this analysis applies bivariate and multivariate analysis methods to endline survey data to compare participant to non-participant households at endline. Sample size was a constraint for bivariate analysis but not for multivariate analysis. This report seeks to explain the main methodological issues and to highlight significant findings from the analyses that are possible given the survey design. This analysis is exploratory in nature and does not determine causality.

A note on analysis of impacts of project participation using FFP surveys

It is necessary to emphasize that FFP baseline and endline surveys are population-based, with the objective to track the changes of project indicators over time of the entire population within project implementation areas. They are not designed to be able to measure the changes in outcome and impact indicators that can be directly attributed to project interventions. The population-based and independent sampling design impose several important limitations on analysis to measure the impacts of project interventions:

- There is no way to distinguish between eventual “treatment” (participant) and “control” households in baseline surveys. For this reason, it is impossible to make comparisons between treatment and control groups prior to treatment: difference-in-difference is not possible. It is also generally not feasible to assume that the average characteristics of treatment and control households are identical prior to project interventions. Most projects explicitly target interventions to more-vulnerable households, or other specific groups within their project implementation areas, so there is expected to be selection bias between the treatment and control groups. In other words, treatment and control groups are likely to be different even at the time of the baseline, so it is not possible to infer that measured differences between project beneficiaries and non-beneficiaries at the endline round can be attributed to project interventions.
- Project beneficiaries typically participate in several different types of project interventions, so there is no single “treatment,” but rather a range of types and levels of treatment that different beneficiaries receive through project participation. Counting all project beneficiaries within a single treatment group would impede the ability to accurately measure the effects of these different combinations and intensities of treatments.
- Endline surveys are not stratified to capture a statistically adequate number of both beneficiaries and non-beneficiaries for certain types of comparisons, particularly direct (bivariate) comparisons of results between beneficiaries and non-beneficiaries: there may not be a sufficiently large sample of either the beneficiary or non-beneficiary group to permit statistically valid comparisons.

All these limitations to analyzing the impacts of project participation based on independently sampled population-based surveys must be considered when interpreting the results from the analyses presented in this report. Because they are not designed for this type of analysis, FFP endline studies do

¹ TANGO International. 2019. Final Performance Evaluation of the Food for Peace Njira Development Food Assistance Project in Malawi.

not include it. This additional analysis for the Njira final evaluation was conducted at the request of Food for Peace.

2. Methods

Population-based Survey Design

United States Agency for International Development (USAID) Food for Peace (FFP) quantitative performance evaluations use a Population-Based Survey (PBS), where the sample is drawn from the general population in a DFAP implementation area. Households are randomly selected; as such, sampling does not target those who directly participate in DFAP activities.

The statistically representative sample was selected using a multi-stage clustered sampling approach. The sampling frame for the endline study was constructed from the 2018 Population and Housing Census enumeration areas (EAs). The Malawi National Statistics Office provided TANGO with a list of TAs and EAs located in the Njira project implementation area; TANGO used these TAs and EAs as the endline sampling frame. In the first stage of sampling, EAs were drawn with a probability-proportional-to-size (PPS) methodology. In the second sampling stage, households were selected randomly from all households existing in the respective EAs sampled.

Stunting, one of several key measures of food insecurity, was used to compute sample size in the baseline and endline surveys. Sample size is the minimum number of households necessary to detect whether stunting decreased to the project target rate of 31.4 percent (baseline value: 37.9 percent), a reduction of 6.5 percentage points. As shown in Table 1, the total target sample size is 630.

Table 1: Information used to compute sample size

Percentage of stunting at baseline (actual)	37.9
Expected percentage of stunting at endline	31.4
Design effect at baseline (actual)	1.0
Percentage of CU5 of the total population at baseline (actual)	17.9
Household size at baseline (actual)	5.0
Minimum required sample size (# CU5; computed)	377
Minimum required sample size adjusted for the number of CU5 per household (# HH; computed)	566
Non-response rate (estimated)	10%
Final target sample size (# HH) (computed)	630

The minimum required sample sizes for the baseline and endline surveys were computed to provide estimates of key project indicators (stunting in particular) with similar levels of statistical precision over the two surveys. However, the minimum required sample size for the endline sample was computed to be significantly smaller than what was estimated for the baseline, because at the time of the baseline, there was less available information about characteristics of project populations, so conservative estimates of key parameters were adopted, following FFP guidance.² At the time of the endline, more

² As described in Appendix A of the Feed the Future Population-Based Survey (PBS) Sampling Guide

accurate estimates of key parameters were available from the baseline results. In particular, the formula used for the baseline to estimate the number of households to achieve a sufficient number of CU5 resulted in a much larger number of children being surveyed than was required for statistical purposes. One reason that the required sample of households to be interviewed in the endline was adjusted downward was therefore to reduce the unnecessary oversampling of CU5. A second reason was that the actual stunting rate in the endline was lower than what was assumed in the baseline sample size calculation. Finally, in Njira, the actual design effect computed from the baseline sample was 1.0: one-half of the assumed value of 2.0 used in the baseline calculations. In sum, adjustments to the minimum required sample of endline households were made for three reasons: a much larger proportion of CU5 per household in the population than expected, a lower rate of stunting than initially estimated, and a lower design effect than initially assumed. These adjustments led to a significantly smaller sample of households required to attain stunting rate estimates with the desired level of statistical precision.

Note: FFP quantitative performance evaluations use a PBS sampling design in which the sample is drawn from the general population in a DFAP implementation area. Accordingly, beneficiaries who directly participate in DFAP activities are not specifically targeted in the quantitative survey; rather, the sample is designed to be statistically representative of the entire population within the project implementation area, which includes DFAP participants and non-participants.

It is important to note that the baseline and endline surveys are independent population-based samples, and there may be systematic, non-random differences between participants and non-participants. As a result, observed differences between participant and non-participant groups, whether positive or negative, cannot be directly attributed to DFAP activities: the PBS is not designed to allow comparisons between participants and non-participants. In the case of the Njira survey, only approximately 20 percent of sampled households self-identified as directly participating in any project activity. However, experience from past FFP surveys suggests that self-reporting of participation may not be accurate, which weakens the validity of any comparison of outcomes. Participation is self-reported by respondents, and there are several reasons to suspect that responses may not always be accurate. One reason is that the interview respondent may not be the member of the household who participated in project activities and may not be aware of the participation of other household members. Also, respondents may report participation in an activity but may not be clear whether this activity was supported by the DFSA or a different project or agency. Finally, the respondent may simply mis-remember their own participation or that of other household members in project activities. These inaccuracies will lead to misplacement of households into either participant or non-participant categories, thereby compromising the accuracy of the analytical results. The analysis has sought to present more accurate information about project participants by consulting project performance monitoring data.

Comparing participants to non-participants at endline using bivariate analysis

Bivariate analysis techniques were applied to compare participants and non-participants at endline. In summary, this found the following:

- Participant indicator values were higher than non-participant values at a significance level of $p < 0.1$ for seven of 41 indicators: 3 women’s dietary diversity, percentage of households using improved sanitation, and five agricultural indicators.
- Non-participant values were higher than participants on one indicator: children under 5 years (CU5) consuming foods made from bio-fortified beans.
- There were no statistically significant differences between participants and non-participants in the remaining 33 indicators, including food security outcome indicators.
- A key element of sample size calculations is the targeted change in an indicator. Testing whether a small change or difference in an indicator is statistically significant requires a large sample, whereas larger differences can be detected in smaller samples. In this analysis, some differences between participant and non-participants were large enough to be statistically significant using a much smaller sample of participant households than the 588 estimated for the PBS. These differences were in the range of 13 to 20 percentage points. For most indicators, the sample size of 116 was not large enough to determine whether the difference was statistically significant.

Two research questions related to food security emerged from these findings and guided the multivariate analysis:

- 1) Does the lack of statistically significant differences between participants and non-participants at endline indicate relative improvement for participant households?
- 2) Do the statistically significant improvements shown in five agricultural indicators translate to better food security?

Computing a proxy for baseline participation

The first step in addressing the first research question was to develop a way to indirectly identify households in the baseline dataset that would have been part of Njira programming if it had been in place. The goal was to find an empirical approach to simulate treatment and comparison groups in the baseline because the baseline data were not explicitly stratified into these two groups. The implication of not having treatment and control groups in place in a baseline is that there is not a straightforward, statistically valid means of comparing outcomes for households that directly participated in project interventions with outcomes for households that did not.

Alternative statistical methods were applied to identify key systematic differences between treatment and comparison groups in the endline data that could then be used to estimate or approximate these two groups in the baseline data set. These analyses require variables that are associated with project participation but are not expected to change as a result of participation. Several techniques, including imputation and propensity score matching, were tested, applying several different variables to measure the differences between participants and non-participants. None of the methods was successful. One issue was that few of the candidate measures or variables for identifying participant households based on baseline data were unchanged at endline. The potential explanatory variables used in these analyses included household education level, household size, CU5 in the household, gendered household type, housing materials, household assets, and land ownership, with traditional area as a geographic control variable. These variables were insignificant in equations predicting project participation. Another

³ This is a count of the basic indicators and does not include findings for results that were further disaggregated by gender or by decision-making “alone” or “joint.”

limitation of these statistical methods was that the equations may have been biased due to omitted variables.

The relationship between farmers' adoption of agricultural practices and food security

Multivariate estimation equations also addressed the second research question, regarding the relationship between farmers' adoption of agricultural practices and food security. The dataset includes all farmers in the PBS who completed Module G: Agriculture, both participants and non-participants. The results apply to practices promoted by the project but extend to all households engaging in the practices, whether or not they participated directly in the project. The equations estimate two food security outcomes:

- 1) a logit equation for moderate to severe hunger and
- 2) an ordinary least squares (OLS) equation for Household Dietary Diversity Score (HDDS).

The explanatory variables mirror the FFP agricultural indicators. In separate equations,⁴ these variables include the following measures of farmer households'⁵ adoption of practices and use of services:

- use of financial services (coded 1 for use, 0 for non-use);
- use of improved storage practices (coded 1 for use, 0 for non-use);
- count6 of adoption value chain activities;
- count of sustainable crop practices;
- count of sustainable Natural Resource Management (NRM) practices;
- count of sustainable livestock practices; and
- the combination of sustainable agriculture practices (NRM, crop and livestock).

Shock exposure is also included in equations. It is measured as a count of up to 14 shocks reported over the past 12 months. It has a mean of 2.2 and ranges from 0 to 8 in the sample.

The equations include the following control variables:

- household demographics (household size, gendered household type, percentage of adults in the household with more than a primary level of education);
- agricultural and livestock assets (measured as a count of different types of crops and livestock);
- count of farmers in the household; and
- geographic district.

Endline household and farmer datasets were combined by collapsing farmer data. They provide a sample size of 496 for the hunger equations and 509 for the HDDS equations.

Equations are of the form:

⁴ Variables measuring adoption of practices and use of services were not included altogether in one equation because they are correlated and when combined, none show statistically significant associations with food security outcomes.

⁵ The equations include households with farmers who have access to land or livestock. Non-farming households are excluded.

⁶ The multivariate equations use counts instead of the indicator categories to increase variability.

$$Y_i = \alpha + B_1P_i + B_2SE_i + B_3X_i + \epsilon_i$$

where:

- Y is a food security outcome (either the probability of moderate or severe hunger or HDDS);
- B is estimated by the equation and equals the effect of each variable on the outcome, controlling for other variables in the equation;
- P is the list of agricultural practices;
- SE is shock exposure; and
- X is the vector of control variables.

3. Findings

This section begins with descriptive statistics from endline survey data comparing project indicator results for participants and non-participants. The section then discusses indicators where participant values were higher than for non-participants, focusing on results that are statistically significant at $p < 0.1$ or lower. Results from multivariate analysis follow, describing whether farmer's participation in agricultural programming is associated with improved food security. As noted above, measured differences between participants and non-participants at endline cannot be inferred to have resulted from project interventions.

3.1 Comparisons of participants to non-participants at endline

Descriptive statistics comparing participants to non-participants at endline are presented in Annex A. For most indicators, there were no statistically significant differences between participants and non-participants. However, participants were higher than non-participants on one WASH indicator, five agricultural indicators and one women's nutrition indicator. Disaggregation shows that for many of these indicators, a statistically significant comparison at the aggregate level is due to statistically significant differences between female participants and female non-participants. (Note that significance tests compared participants to non-participants – not males to females.)

WASH indicators

A higher percentage of participants (51.2 percent) than non-participants (35.6 percent) used improved sanitation facilities at endline; however, overall, there was a decrease from baseline to endline from 56.5 percent to 38.8 percent.

Agricultural indicators

Participants had higher values than non-participants for five of seven agricultural indicators. Disaggregation by sex shows that these differences are due to higher values for female participants compared to non-participants.

- A higher percentage of participant farmers than non-participant farmers reported using financial services (37.4 percent compared to 25.8 percent) at endline. Among female farmers, 44.2 of participants compared to 24.0 percent of non-participants used financial services.
- Similarly, use of value chain services was higher for participant than non-participant farmers (41.6 percent compared to 24.5 percent). Among female farmers, 46.0 percent of participants reported practicing value chain activities, versus 23.2 percent of non-participants.

- Eight out of ten farmer participants (80.1 percent) used at least two sustainable crop practices and/or technologies, compared to 68.5 percent of non-participants. For both male and female farmers, the percentage using at least two sustainable crop practices or technologies was higher for participants: for male farmers, 77.6 percent of participants compared to 67.3 percent of non-participants, and for female farmers, 81.7 versus 69.3 percent.
- The percentage of participant farmers who used at least three sustainable agriculture (crop, livestock, NRM) practices and/or technologies was higher than non-participant farmers (63.0 percent compared to 47.7 percent). For female farmers, the values for this indicator were 66.3 percent of participants versus 45.1 percent of non-participants.
- The percentage of participant farmers who used improved storage practices was higher than non-participant farmers (27.4 percent and 13.7 percent, respectively). For female farmers, the respective values were 29.9 percent and 14.7 percent.

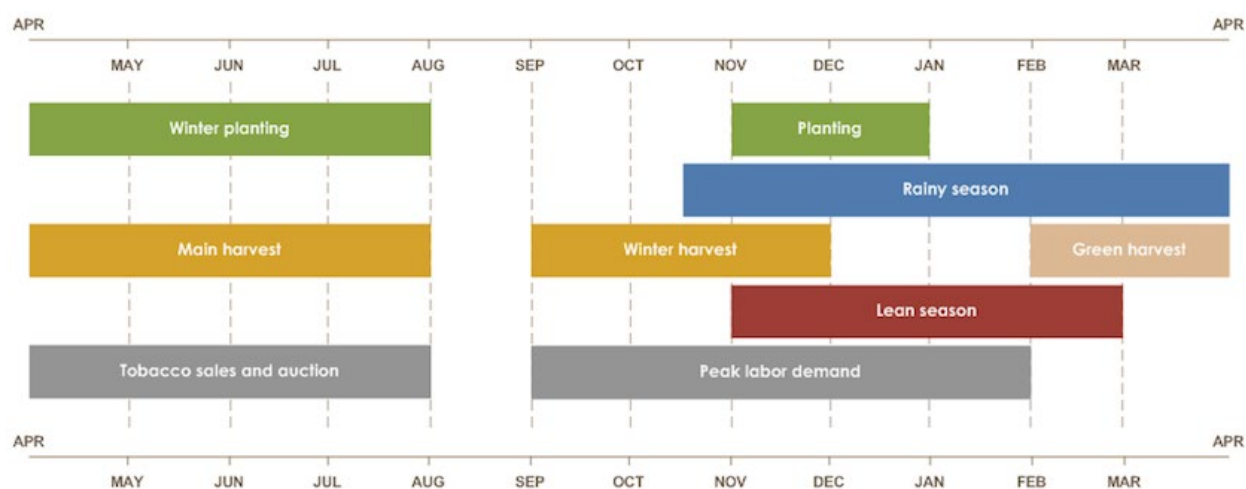

Women’s health and nutrition indicators

Women participants had higher dietary diversity scores than non-participants (3.2 compared to 3.0). (The overall household dietary diversity score was the same at endline for participants and non-participants, at 3.2. and there was no significant difference between baseline and endline).

Food security outcomes

Based on the endline PBS data and baseline estimates from the FFP Outcome Monitoring survey, there were no statistically significant differences in moderate to severe hunger or HDDS between participants and non-participants. However, the results from the PCI Annual Beneficiary Survey show both higher levels of HDDS (and some nutrition indicators) and improvements over the baseline. Differences between these results are likely due to survey timing. The PCI survey took place in September and October at the beginning of the lean season, whereas the baseline and endline FFP Outcome Monitoring Surveys were conducted in July and August in the middle of the rainfed harvest season. Figure 1 shows the Malawi seasonal calendar.

Figure 1. Malawi seasonal calendar

3.2 Relationships between farmers' food security and agricultural program participation

In response to the second research question, this section describes findings from several equations estimating relationships between food security outcomes and agricultural indicators. This is an exploratory analysis to examine the relationship between farmer households' food security and use of project-promoted agricultural practices. The analysis focuses on farmer households and includes all farmers identified in the PBS.⁷ Households with no farmers are not part of the analysis. It uses variables that are computed as counts of activities to allow testing of hypotheses related to project layering.

The results show additional benefits for each activity, and the benefits of these practices generally. Overall, the results indicate that the adoption of agricultural practices and use of services translate to improved household food security as measured by moderate to severe hunger, which is computed from the household hunger scale,⁸ and HDDS.⁹

This section presents findings from equations where variables measuring Njira project participation are statistically significant. Complete results are presented in Annex B.

Moderate to severe hunger

Table 2 shows the results of three logit equations estimating the probability that a household experienced moderate to severe hunger. They indicate that three variables related to Njira programming are associated with lower probability (lower being signaled by a negative sign) that a household will experience moderate to severe hunger:

- use of financial services (column 1);
- adoption of sustainable livestock practices (column 2); and
- agricultural practices - NRM, crop and livestock (column 3).

In all three equations, the number of farmers in a household increases the probability of moderate to severe hunger (a positive sign signaling increased probability). The number of farmers in a household is a proxy for livelihood diversification. This finding therefore suggests that lack of diversification is detrimental to food security.

⁷ While the use of the target practices was found to be higher among participants than non-participants, it is important to keep in mind that this analysis cannot ascertain causality. Participants may or may not have adopted the practices because of Njira programming. Non-participants engaging in the target practices may have already been engaging in these practices, learned them from Njira participants (spillovers), or received training from someone else.

Use of financial services

On average, 49.5 percent of participant farmer households and 28.2 percent of non-participant farmer households reported using financial services. Converting the coefficients from equation (1) in **Table 2** to probabilities,¹⁰ we find that on average, use of financial services is associated with a 10-percentage point reduction in the probability of moderate to severe hunger, reducing it from 0.58 to 0.48. **Figure 2** compares the probability of hunger for participant farmer households. The probability of hunger was 0.53 for participants households using financial services compared to 0.55 for non-participants using those services.

Figure 2. Relationship between use of financial services and moderate to severe hunger, non-participants vs participants, Njira endline

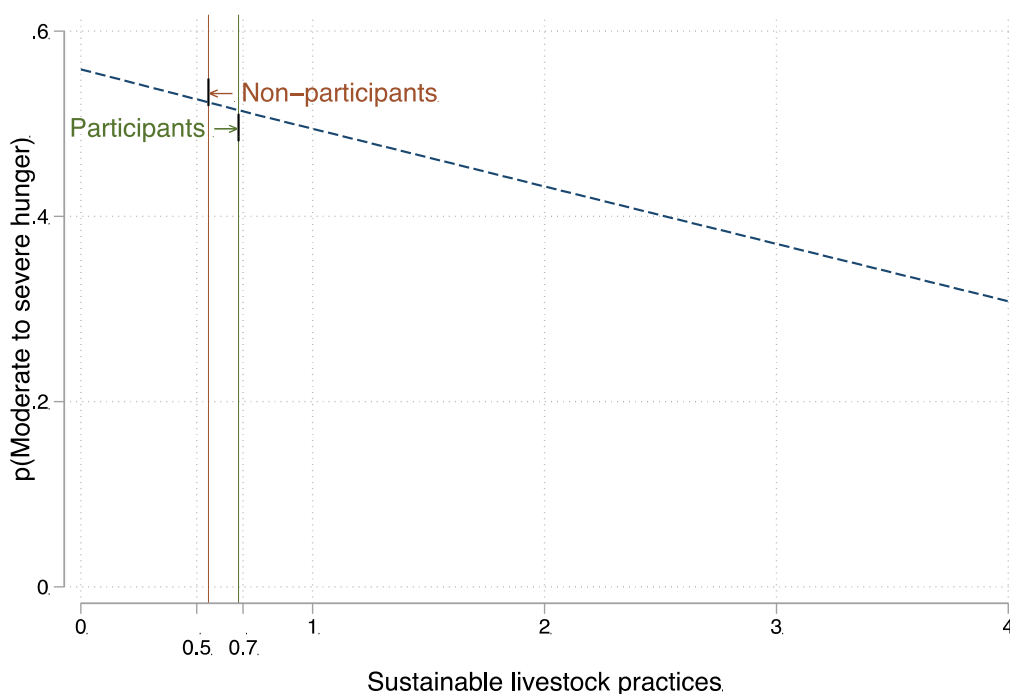

¹⁰ Predicted probability = $1 / (1 + e^{-xb})$

Adoption of sustainable livestock practices

Figure 3 shows results from the equation estimating the association between farmers’ adoption of sustainable livestock practices and the probability of moderate to severe hunger. The equation includes all farmers, both participants and non-participants. The probability of moderate to severe hunger is plotted on the y-axis; the x-axis represents the count of sustainable livestock practices adopted. The x-axis also shows the range of reported livestock practices among farmers owning livestock (0-4) and the mean number of livestock practices adopted by participants (0.7) and non-participants (0.5).¹¹ The sloped line illustrates that the probability of moderate to severe hunger decreases steadily as households adopt additional livestock practices: farmer households adopting four sustainable livestock practices had a 0.31 predicted probability of moderate to severe hunger, compared to 0.56 for farmer households not adopting any. This trend in the data supports the notion that there are benefits to layering interventions.

The graph also shows that on average, non-participants had a 0.52 probability of moderate to severe hunger (the y-coordinate at the intersection of the slope and the non-participant mean). For project participants, the probability of hunger was slightly lower: 0.49 (the y-coordinate at the intersection of the slope and the participant mean).

Figure 3. Relationship between adoption of sustainable livestock practices and moderate to severe hunger, non-participants vs participants, Njira endline

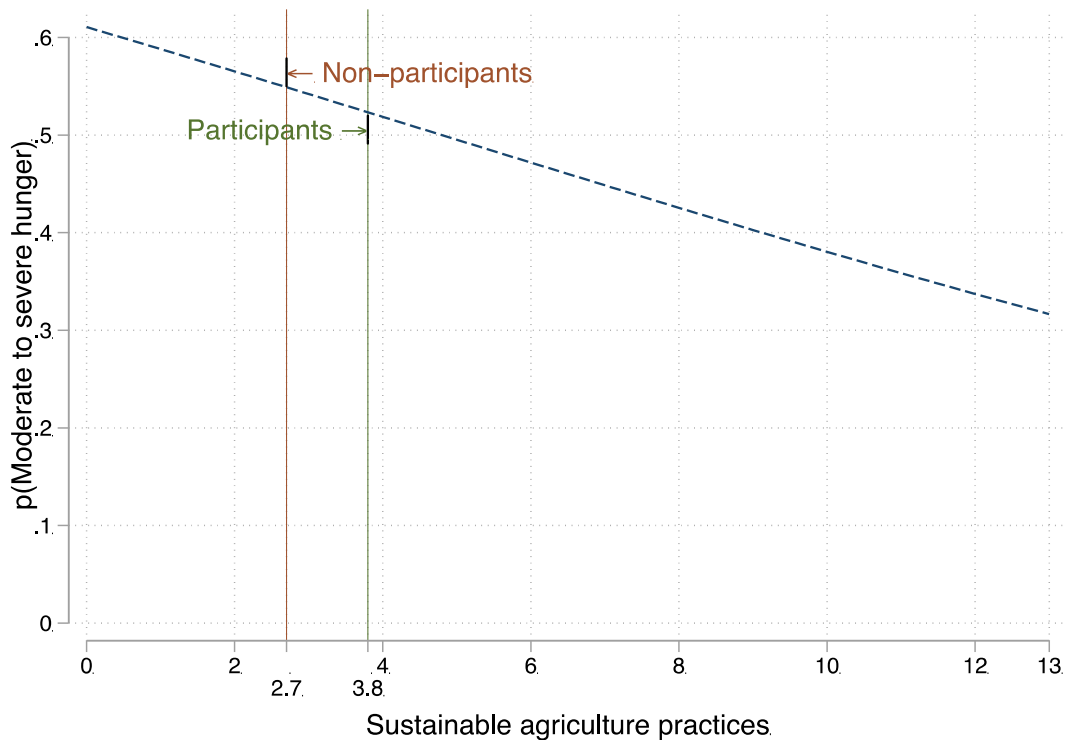

¹¹ Note that mean values differ from **Table 2** because this is a household-level, not farmer-level analysis and the weights and sample sizes are different.

Adoption of NRM, crop and livestock practices

The results presented in Figure 4 provide additional support for the benefits of layering. The figure shows the relationship between the probability of moderate to severe hunger and farmers' adoption of a combination of sustainable NRM, crop and livestock practices. On the x-axis the figure shows the range of agricultural practices adopted (0 - 13), with lines for the mean number of practices adopted by non-participants (2.7) and participants (3.8). Moving across the range from 0 practices to 13 reduces the probability of hunger by almost half, from 0.61 to 0.32. Each additional practice was associated with a reduction in the probability of moderate to severe hunger of 0.02.

For participants on average, the probability of moderate to severe hunger was 0.52 (the y-coordinate at the intersection of the slope and the participant mean), slightly lower than for non-participants: 0.55 (the y-coordinate at the intersection of the slope and the non-participant mean).

Figure 4. Relationship between adoption of sustainable agricultural practices (NRM, crop and livestock) and moderate to severe hunger, non-participants vs participants, Njira endline

HDDS

The following table and figures show results from multivariate equations estimating HDDS. Table 3 shows that the following measures are associated with improved dietary diversity:

- farmers' use of improved storage (column 1);
- adoption of project promoted value chain activities (column 2);
- NRM practices (column 3); and
- agricultural practices (NRM, crop and livestock) (column 4).

The results of this analysis are discussed in more detail following the table.

Improved storage

Of project participants, 30.8 percent reported using one or more improved storage practices, compared to 14.5 percent of non-participants. Converting the coefficients in column (1) in Table 3 to probabilities shows a small but statistically significant difference in HDDS between participants using improved storage practices (HDDS 3.4) and non-participants using improved storage (HDDS 3.2).

Figure 5. Relationship between use of improved storage practices and HDDS, Njira endline

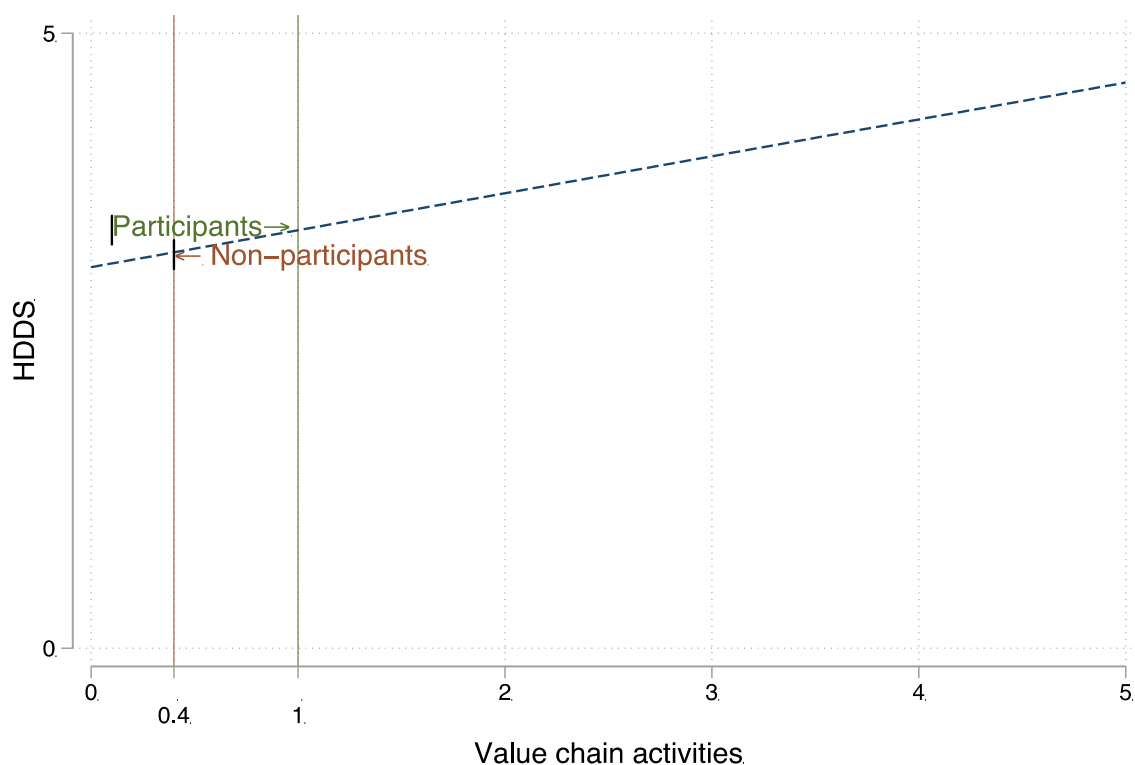

Value chain activities

Figure 6 plots the count of value chain activities against HDDS. The upward-sloped line illustrates that each additional value chain activity is associated with an increase of 0.3 in HDDS. The x-axis shows the range for reported value chain activities (0 to 5) and lines for the means for non-participant households (0.4) and participant households (1). Farmer households in the full sample (participants and non-participants) practicing five activities had an estimated HDDS of 4.6 compared to 3.0 for farmer households (participants and non-participants) not practicing any value chain activities.

Njira farmer households on average, had a slightly higher estimated HDDS of 3.4 (the y-coordinate at the intersection of the slope and the participant mean) compared to 3.2 for non-participant farmer households.

Figure 6. Relationship between value chain activities and HDDS, Njira endline

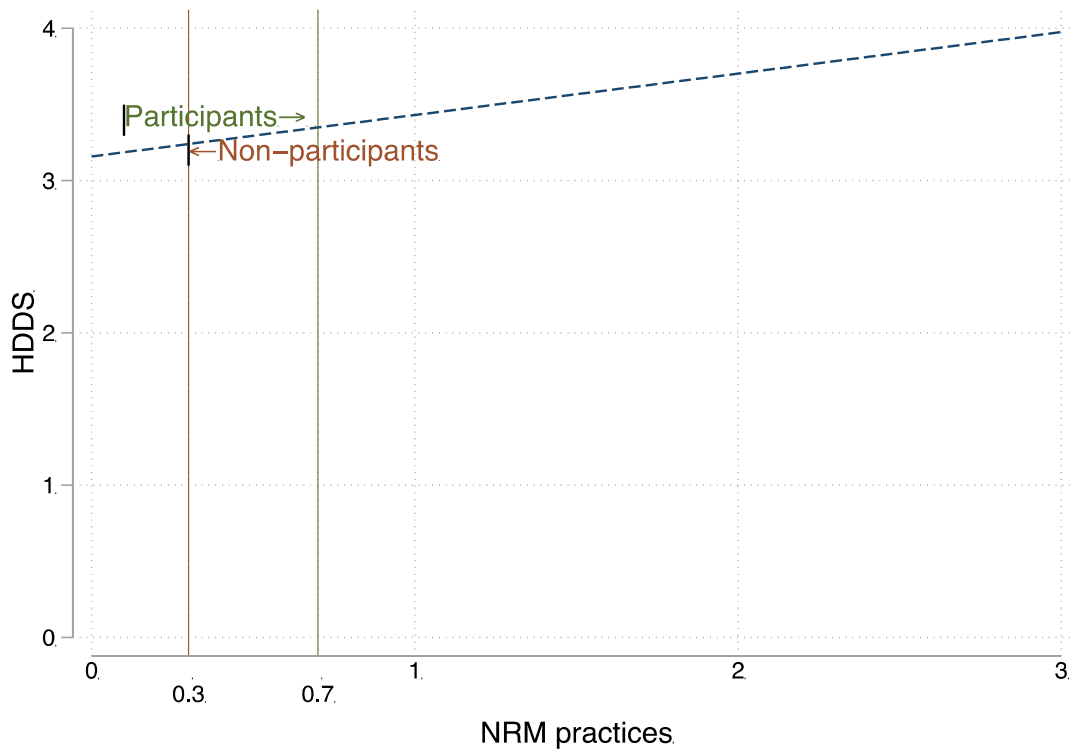

NRM practices

Figure 7 plots the count of sustainable NRM practices against HDDS. The upward slope illustrates that each additional NRM practice is associated with an increase in HDDS of about 0.3. Moving from 0 practices to 3 is associated with an increase in HDDS from 3.2 to 4.0.

Estimated HDDS scores were higher for Njira participants, who engaged in an average of 0.7 NRM practices (the x-coordinate at the intersection of the slope and the participant mean), compared to non-participants, who engaged in an average of 0.3 NRM activities (the x-coordinate at the intersection of the slope and the non-participant mean).

Figure 7. Relationship between adoption of sustainable NRM practices and HDDS, Njira endline

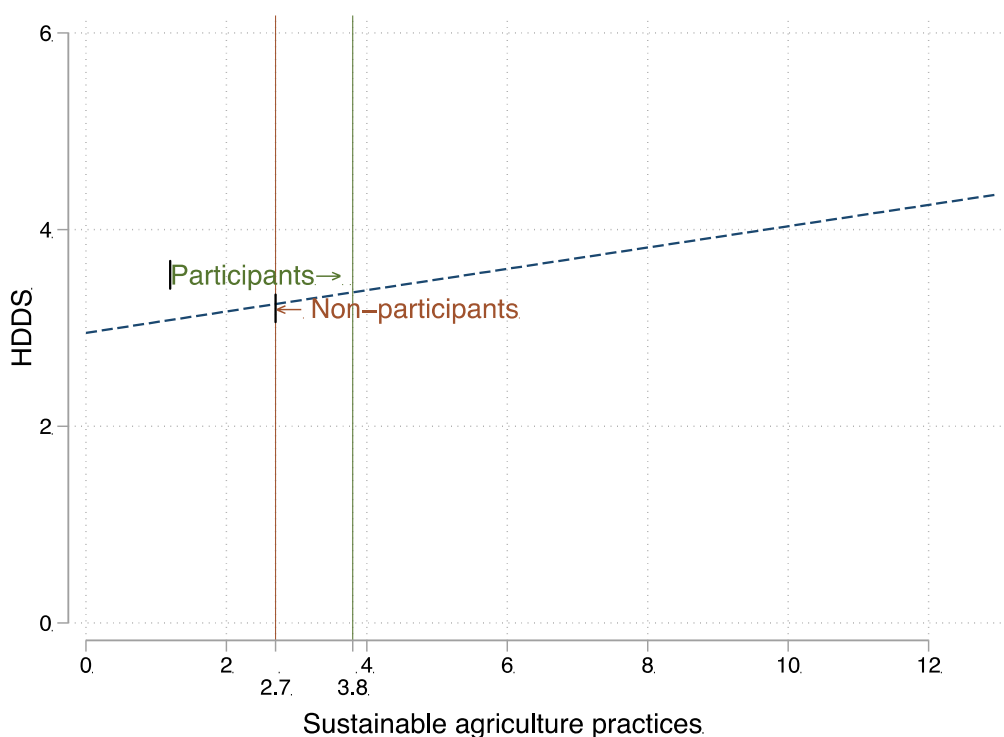

Agricultural practices

Figure 8 plots participation in agricultural activities (NRM, crop and livestock activities) against HDDS and shows a positive association: higher participation in these activities is associated with improved HDDS. The x-axis shows the range of reported agricultural activities (0 - 13) and lines for the means of participants (3.8 activities) and non-participants (2.7 activities). Farmer households participating in 13 activities had an estimated HDDS of 4.5, while those not participating in any activities had an estimated HDDS of 3.0.

Project participants engaging in the mean number of agricultural activities (3.8) had an estimated HDDS score of 3.4 compared to 3.2 for non-participants engaging in the mean number of activities (2.7).

Figure 8. Relationship between participation in sustainable agricultural activities and HDDS, Njira endline

4. Summary and conclusions

This report provided analysis of data from the endline PBS survey. The analysis examined differences between participant and non-participant households. The main analytic issue was the lack of a comparison group for Njira project participants at baseline. Because of this, there was no way to measure change from baseline to endline for project participants. Endline results did not indicate differences between participants and non-participants in food security indicators. Simulating a baseline comparison group would have allowed the analysis to test whether this was an improvement for participants, meaning that they started lower than non-participant households and by endline had achieved the same level of food security. However, the methodologies used to “recreate” a comparison group were not successful, and no statistically valid conclusions could be drawn regarding baseline-endline comparisons of participant and non-participant groups. This type of analysis is outside the scope of PBS indicator monitoring and the sampling design does not allow for it. The strong interest in this comparison suggests that an impact analysis should be considered in project scoping and budgeting phases.

Additional analysis gave results showing important relationships between outcomes: farmer households in the overall sample (both participant and non-participants) engaging in project-promoted activities had higher scores on food security indicators. Results indicate the benefits of participation in agricultural programming for food security but they also show that on average, the number of activities reported by farmer households is low, compared to the total possible. Because of this the effects on food security for farmer households on average, although statistically significant are very small.
